

# SAP S/4HANA Optimization and Migration

## Fujitsu helping our clients optimize their applications landscape

Fujitsu conducts complete architect reviews of application landscapes to help clients simplify, gain efficiencies, and enable future agility and growth. With our seasoned professionals, Fujitsu can conduct assessments for:

### **ERP consolidation and legacy to SAP® rationalization assessment**

To derive a solution approach and technology option with the objective of moving as many applications as possible under the SAP umbrella of applications.

Key activities include:

- Verify the feasibility of consolidation
- Assess business functionality and applicability to move to SAP. If not SAP, what is the right option?
- Develop high level solution and application architecture
- Help decide what is it best--to leverage existing SAP footprint or implement "green field"
- Determine feasibility/impact of incorporating new technologies / trends e.g. SAP S/4HANA™, Cloud/Hybrid, IoT, Mobility
- Ascertain the implementation options with pros and cons
- Develop detailed implementation Roadmap and Blueprint
- Establish quick wins strategy
- Provide an estimate for the complete consolidation

- Identify the main processes which require harmonization and standardization
- Identify specific localization requirements for each line of business / country where applicable
- Provide the framework for a global solution template
- Recommend the Global Enterprise Structure
- Establish the effort and cost to move to SAP
- Provide solution design ( blueprint ) including fit-gap analysis for identified non-SAP systems

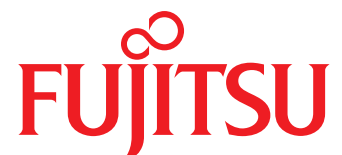

### **Middleware assessment**

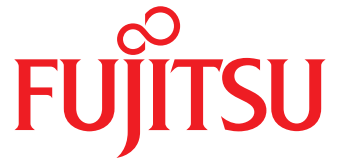

To derive a solution approach and technology option with the objective of moving towards a single (or maximum two) middleware tools

Key activities include:

- Assessment to evaluate alternative middleware architectural solutions for the existing middleware patterns
- Development of middleware standards, guidelines

shaping tomorrow with you

## shaping tomorrow with you

- Generate architectural roadmap based on the identified messaging patterns
- Produce a ROM on the delivery roadmap

### Migration to S/4HANA business case

Ascertain the complexity of your existing SAP Enterprise landscape and develop a plan to simplify it—including realizing ROI in a reasonable timeframe and options such as the cloud.

Key activities include:

- Protecting existing investments in HW and SW when migrating. Re-use of available servers
- Review of existing design principles and redundant data layers to decrease your TCO
- Review of customer built ABAP and SW upgrades/maintenance
- Plan for migration of database to HANA platform
- Plan and review collaboration and integration of both SAP and non-SAP systems
- Determine how SAP Fiori intuitive interface can help you
